Drawing A Crescendo

Jason 5.5 arrives with a great sense of purpose. He found the barrette pictured at left just before coming to the program and recognized in the shape of the clasp the symbol for a crescendo learned through music class. "I need a ruler."

Jason draws a "v" on its side (in math - a "less than" symbol) and explains its meaning to a curious Brenda.

Inside the figure he begins to draw a series of symbols for the increase in volume the figure represents - "A ball that's not moving", to indicate silence. He follows in order with "shifting sand", "waves" and finally "a firecracker".

When asked, Jason provides a song by way of example, beginning very quietly and ending with a bang.
